

“3 Ninja Traffic Methods That Will Bring You All The Online Traffic You Will Ever Need - On Almost Any Budget”

*“Use these methods with the **5FigureDay** system and you will have a virtually **unstoppable** online money machine...”*

If you're not already seeing your list and income grow with the 5FigureDay system, **the problem is simple**. Either you're:

1. Not sending enough traffic to your 5FigureDay website(s).
2. Not sending quality traffic to your 5FigureDay website(s).

No system, opportunity, business (online or off), website, or similar can survive without quality traffic. The 5FD system is well proven to work as plenty of members will attest to... [Check this out!](#)

“You don't need another shiny object. You need traffic! So read this special 'ninja' traffic report like it's on fire...”

The information you're about to discover within these few short pages could be expanded into a full blown coaching program offered at \$1497 per client, because it flat out works... But I'm going to give it to you for FREE because it's going to help you build your network of free and paid 5FigureDay website owners – which helps both of us. That is to say, when you succeed, we succeed together. Nothing makes me happier (business wise) than to see members making their first sale.. Then their first \$500... Then their first **\$1,000 in monthly recurring income, and on up!**

5FigureDay offers a **revolutionary opportunity** which can enable you to build a profitable list, and a serious monthly cashflow along with it, where you won't be depending on "the next wave of one time only sales."

But enough said! Let's dive right in – the following (3 overall) "Ninja Traffic Methods" are really all you'll EVER need to get all the online traffic you can handle (both free and low cost). Print this report out and save it for good!

"Infinite FREE Traffic ...for your 5FigureDay system!"

Here is your proven, simple 2 step "game plan" for getting endless ongoing *free* traffic to any 5FigureDay website (free or paid, and Unleashed or Reloaded versions)...

Step 1.

As fast as you can, build your list up to 200 to 500 subscribers by promoting your 5FigureDay website(s) of choice.

Now, the **best, fastest way to do** this is simply to use PAID traffic – using my 2 "**Infinite PAID Traffic**" methods outlined below.

In other words, if at all possible you want to use **paid methods** to "launch" your 5FigureDay website(s) – to jump start your list and income building.

Here's the **MASSIVE mistake** that most people commit in trying to make money online, which virtually guarantees their failure – regardless of the opportunity they're involved in: They do a Google search for "free traffic" and invariably come across safe lists, traffic exchanges, classified ads, etc., and they go straight to these types of **bottom of the barrel** traffic methods that are NOT worth a SECOND of their time and effort!

There is this **success killing mindset** out there (with too many people) that online marketing means "free traffic and free money." The same mindset leads directly to the false expectation that "all traffic is created equal" and that if a certain type of FREE (or even paid) traffic isn't getting results, it must be the

opportunity, product, website, or system that isn't working. **This is so wrong, and so damaging, and has no doubt kept *millions* from success online!**

You could sit there in your kitchen or on your couch for ***months*** trying to get to 200+ subscribers by submitting classified ads or doing traffic exchanges and safe lists – that type of thing. But you see, this violates *both* problems I mentioned above: **You won't get enough traffic this way, and it will be bottom of the barrel in quality.** It's just not gonna work for you! There is ONE classified ad site that is an exception which I mention in the 5FD member area, but it's possible that other members have already “used it up,” and besides that, it simple does not compare to the methods I'm laying out for you here.

Anyhow, enough said there. Let's keep moving...

Step 2.

This is where your endless FREE traffic kicks in...

Once your list is built up, you can begin contacting other list owners (people just like you) to exchange email messages sent to your mutual lists. This is called doing “ad swaps.” Literally all you're doing is asking another email list owner if they'd like to run an ad swap – they run your ad to their list, and you run their ad to your list. There are no rules, really. It's just simple communication from one list owner to another. Nothing scary. Nothing fancy. Very easy.

A couple tips (especially if you're really active with your list): I recommend that you not do more than 2 or max 3 ad swaps per week to your email list. And make sure to choose quality offers that your subscribers can benefit from – free offers are ideal. 5FigureDay works extremely well for swaps, because your main Unleashed 1.0 website is a free offer that most list owners would be happy to send to their subscribers (it's an awesome free gift – which makes them look good as the list owner)! You can always politely turn down an ad swap if you don't like the offer you're being asked to send out. ...Or you can do it rudely by telling them to take a hike! ...Lol, go the polite route.

So why just 2-3 swaps max per week? It actually works out perfectly that way, because you can reserve the other days for PAID offers and promos *of your own*. I recommend running paid promos on Tuesday, Wednesday, and Sunday. Your ad swaps can run on Monday, Friday, and Saturday. On Thursdays you might wanna send your own free offer or content to your list - something

personal to build a better relationship with your subscribers.

...Note that all of this assumes you want to “run” email list (which just means sending emails and keeping in touch with subscribers on a regular basis), which you're obviously not “forced” to do. I *do* recommend it since **an email list is a cash on demand asset**. Literally any time I want to make money, I can send an ad to my email list and make commissions. Like clockwork. The last campaign I ran to my own personal list is set to make me **thousands** per month – it was for 5FigureDay! (Imagine that!) But it's up to you. Some members indeed ignore the email lists they build with the 5FigureDay system, and simply work on commission building. That's fine too, but you're leaving a lot of potential money on the table (and an endless free traffic method!) if you don't want to manage your email list by keeping in touch with people, sending them content, etc.

There is also a “middle ground option” where you can just loosely manage your email list by sending them an email once every couple weeks. This certainly won't do you any harm. It just means that you won't have quite the bond and trust with your subscribers that you could otherwise have by keeping in more regular contact with them.

Following are some ad swap resources to get you started, but keep in mind there's **more** (ad swap resources) if you search Google, search Internet marketing forums, etc... And I highly recommend you *do* in fact look for additional ad swap venues of your own, so that 5FD members aren't all using the same resources. You could also easily contact list owners one on one through their websites, forums, and so forth.

Ad Swap Resources:

- <http://www.listswapper.com/> (Recommended By Willie Crawford)
- Find Many Ad Swaps In The [JV Section Of WarriorForum.com](#)
- [Safe-Swaps.com](#) (Paid Service, But The ULTIMATE Ad Swap Community)
- Google [Search Results For 'Ad Swaps'](#)

And there you have it – your ENDLESS free source of potential leads and commissions for the 5FD system.

With a little creativity you can really **expand** on this free traffic method. For example, if a particular swap works out well and just seems to “click” on both

ends of the deal, offer to swap **automated follow up messages** (if you use an autoresponder service such as Aweber or Getresponse). An automated follow up message is simply an email that you load up in your autoresponder account to go out automatically on a set day (such as “5 days out”) to each visitor that has subscribed to your list. So for example you could suggest that your swap partner sets up your email (your 5FigureDay promo email) to run within the first 10 days of when a new subscriber joins their list, and that you'd do the same for them. Once in place, you have an email message for your 5FigureDay site going out to all of this other person's fresh subscribers. How awesome is that? Think about what other things you can swap as well... Do you both have a blog or website with extra space for a banner ad? If so, consider swapping banner ads for even more free (autopilot) traffic!

But now, what if you can't afford paid traffic to “launch” one of more of your 5FD websites to get those initial 200+ subscribers? This is where you'll simply need to roll up your sleeves and start immediately applying some quality free methods outlined in the **Instant Traffic Bootcamp** section on your 5FigureDay member home page. Methods such as forum marketing, blog posting, and doing Youtube review videos will definitely work. But they'll take more of your time – that's the trade off. However, stick with it and you'll still meet your initial 200+ goal...

One final option (if you're in a financial jam) is to earn a quick advertising budget via Craigslist.com. This is so dead simple! We all have stuff that would be of value to others, but that we don't use or want any longer. List such items on Craigslist.com to **make some quick cash**. And then, simply use that cash as your “launch money” (kinda sounds like “lunch money” - lol) to launch your 5FigureDay website into the 200 to 500 subscriber range using one or both of my Infinite PAID Traffic methods below.

To review your traffic game plan:

- 1. Build up a "base list" of 200-500 leads by promoting your 5FigureDay websites (ideally) via my **Infinite PAID Traffic** methods below.*
- 2. Your base list will give you enough leads to begin doing endless FREE ad swaps (and more) to get unlimited FREE traffic, leads and commissions with the 5FigureDay system.*

Now here's the best part of all:

*You get **monthly** 5FigureDay RELOADED websites, meaning if you've already done swaps with a particular list owner for one 5FigureDay website and they*

don't want to run the same ad again – you can "start fresh" every month with your NEW Reloaded website...

...to keep building your 5FigureDay list and income! Pretty awesome 'ey?!

“Infinite PAID Traffic ...for your 5FigureDay system!”

Can you change your life in 2 short weeks?

Well let me tell you about a 5FD member named Chuck, who in my opinion has done exactly that.

Chuck was showing a "big fat zero" in his 5FigureDay account when he first logged in...

...imagine that! ;)

But he took **SERIOUS ACTION** and started *promoting* his viral 5FD websites *right away*.

He didn't put it off until next week or next month. **He WENT FOR IT.**

And [here are his results](#) – straight from the horse's mouth!

...Even 75% of his 57 (and growing) referrals stay on board with 5FigureDay, he's set to make **\$1,892 in MONTHLY commissions!**

...All this in under 2 weeks!

\$1,892 is a mortgage payment for a *nice* house. How would you like to essentially be mortgage or rent free in the next 2 weeks?

Life changing indeed.

Now obviously this cannot be classified as “typical results,” since there are those

people who will do NOTHING no matter how powerful the system – sadly! But I could share plenty of other *awesome* results that 5FD members are getting, except that what's really important here is your success.

“And all you've gotta do is start promoting. Just like Chuck.”

At the very core, 5FigureDay uses the *same exact methods* that MOST successful online affiliates and marketers use...

Meaning our system *IS* how money is made online... People promote email capture pages to build their lists, and they promote products on the backend! That's IT. Again, that *is* what people do - and no doubt you've seen it done around every corner because it works...

But of course, the 5FigureDay system takes this time tested marketing strategy and LEVERAGES your efforts, by putting your own subscribers to "work" FOR you! You're no longer just building a list one by one...

You're building a TEAM of people who will (automatically) send you ***autopilot leads and potential commissions***...

Your subscribers are also your referrals, and your referrals ***make you money*** (i.e., they send you valuable leads and clickthroughs) as they promote *their* 5FigureDay websites.

<>-----<>

Note that if you're a 5FigureDay FREE-version member, some of the benefits mentioned here won't apply to you (such as our “infinite” lead forwarding and backend residual income potential)... However the following proven traffic methods apply to ALL members. So keep reading, and take massive action!

<>-----<>

For any 5FigureDay member still "stuck" at zero leads, the 5FigureDay system is not the problem - it's the PROVEN *answer* :

All YOU need to do is *give away* our free version sites – which happens automatically as you promote your own 5FD websites.

In other words, you need to send traffic (and the right KIND of traffic)...

In considering what type of quality traffic you should be focusing on, simply think about where YOU buy stuff online...

Have you EVER bought anything from a traffic exchange? Probably not!

How about a safelist? Probably not!

Have you ever bought an Internet marketing related product from a classified ad? Again, very unlikely.

Where MOST people buy products related to making money online is from email lists, banner ads, blog reviews, video reviews, marketing related forums, etc. (Think about where and how YOU heard about 5FigureDay, as an example!)

Again, the key to where YOU should be advertising is found in thinking about where people NORMALLY buy stuff online – and in this case, business opportunities and online income related products specifically.

What you want to do "plug in" to those types of channels to promote 5FigureDay!

...With that in mind, let's focus on two **very simple but proven effective** paid sources of ENDLESS traffic for building up your 5FD list and income to your desired goal...

Are you ready? You should really print this out and keep it as a handy reference...

OTHER PEOPLES' LISTS

Typically, running ads to other peoples' email lists is called "solo advertising." Basically, you're just paying to rent a list for a day. You send the list owner the email ad that you want them to run to their list, and they run it for a one-off fee. Easy! It's just email!

Often you can choose to send to a smaller segment of their list to start out with - such as 100 to 200 "clicks" on the 5FigureDay website link in your solo ad (email message).

If the ad does well, you can then blast to their full list on another day.

Inside your 5FigureDay member area you'll find:

- Ready made email ads that you can use for solos!
- A list of solo ad providers (list owners who run solo ads)!
- More solo ad success tips!

...One critical thing to keep in mind here though is that the solo ad sources mentioned in the 5FD member area could get burned out over time...

So just make sure to ASK the list owner that you're running an ad with whether they've run ads for 5FigureDay within the last couple months. If so, you may want to move on to another list – *unless* their list is growing very quickly and has lots of fresh new leads that will see your 5FD ad for the first time.

Another "trick" is simply to go straight to Google to search "email solo ads." That way, you can come up with your OWN "private" mini directory of "solo lists" that you can run ads to each month. Note that we release new RELOADED websites each month, meaning you'll *never* run out of fresh list and income building potential as a 5FD member.

Just make sure to ask for references to see if the list performs well! Be careful, since there are list owners out there who send nothing but ads every day and burn out their lists in doing so. Don't run solos to those types of lists. If you want, you can *join* an email list (subscribe to it yourself), and then track it for a while before buying solo ads to run to that list.

Also, consider tapping into lists where the (list) owner may not have even considered running solos. This will take some leg work, but **wherever** you see a subscribe box – somebody is "behind" that box building a list! ...Perhaps they'll run your solo ad to their list! It NEVER hurts to contact them to ask, and it's a simple *numbers game*: KEEP ASKING and you will hit on list owners who will accept your offer to run ads to their list.

If not a full blown "solo ad", ask if you can run a classified *style* ad (5 to 10 lines) to appear in the next mailing that the list owner sends out. You can get these for less money than solo ads, and sometimes get just as many clicks! (These are actually called "top sponsor" ads.)

...By making Google your starting point and digging up **untapped lists** - not relying on JUST the solo ad providers that we have in the member area - you will be FAR ahead of many 5FD members who simply won't take the time because they can't match your drive and desire to succeed (like crazy)!

Finally, what other types of "lists" can you think of that you can tap into? How about contacting eBay sellers with BUYER'S lists? You'll need to look for eBay sellers who promote "make money" ebooks or biz opps, so that the leads are targeted toward the 5FigureDay opportunity. How about Twitter "lists"? Jump on Fiverr.com and you'll find Twitter account owners who will "Tweet" your ad to their Twitter followers for just \$5! (You'll also find *solo ads* on Fiverr.com along with references.) How about Youtube account holders? Make a short "review video" about 5FigureDay, and offer to pay the Youtube Channel owner a fee to publish your video on their account! Have them post your 5FD website link in the description box under the Youtube video. Make sure to tell people to click on the link under the video (in the video itself).

“...If you get just a LITTLE bit creative, you can find ENDLESS lists to promote 5FigureDay to.”

Again, there are no "rules" in this business! You don't have to sound "professional" at all. Just be yourself, get out there and get your feet wet. Test SMALL, and THEN "go big" as you find lists that convert!

AUTOPILOT BANNER CLICKS

Banner ads are those little "box style" display ads that you see all over the web. The banner just "sits there" on a blog or web page, and if a visitor to that website clicks on the ad, they are of course taken to the web page being promoted in the banner ad.

We've got attractive, professional banner ads for you in the 5FigureDay member area. And [here's a "rough directory" of websites that run banner ads](#) (some of these may be expired, but it's still a good start).

(...I'd also *strongly* encourage you to read my additional tips on banner advertising *inside* the above download!)

Here again it's the same as with solos... You can definitely check out the resources I list, but it would ALSO be a great idea to come up with your own "exclusive" list of sites to run banner ads on – starting once again with a Google search...

You can search things like "banner ads," "banner ad rates," "banner ad requirements," "advertise with us," etc. **You can (also) go to ANY website or blog targeted to online marketing or making money, and simply ASK the owner if they have a page that gets visitors where they'd be able to run your banner ad for a small or reasonable fee.** Again, there are no rules here! You can offer whatever you think is fair, wheel and deal until the cows come home, or try bartering if you don't have the money (maybe you have an online product you could "pay with" in exchange for running your banner, or your own blog where you'd run their banner in exchange for them running yours, etc.)...

Think about the countless download pages and member areas of product owners on the Clickbank.com network, where you might be able to get a banner ad placed for cheap – since many website owners aren't in the business of selling banner ads and just might be willing to run YOURS for a small fee – almost as an afterthought.

“Here again it's a simple numbers game: Ask enough sites and you WILL get amazing deals on 5FigureDay banner ad placements.”

And the "online real-estate" upon which to do this is once again...

ENDLESS!

You'll never run out of potential banner ad spots and sources of traffic!

Consider landing pages (after opt ins), download pages or member areas (as mentioned), blogs, content based websites, etc. You could also find marketers on Facebook with large friend lists, and offer to pay a fee if they'll post your banner image with your 5FigureDay website link underneath!

Make no mistake, this DOES take some leg work once again... But just think - **ONE banner placed online will bring you AUTOPILOT traffic for as long as it's up!**

...And some website owners will leave your banner up *permanently* – even if this wasn't your initial agreement. They forget, they never get around to removing it, etc.

Just remember, the more targeted the better. You don't want to be contacting sites related to underwater basket weaving to run your banner for 5FigureDay! ;)

Keep in mind that you can check Alexa.com for the traffic RANK of sites. The LOWER the number, the more traffic they're getting. I'd recommend that you look for sites that are ranked under 100,000 U.S., but 200,000 *max* or it's probably not worth your effort (or money).

One final killer tip: If you go over to the Special Offers section of the WarriorForum.com, or over to JVNotifyPro.com, you're going to come across people *launching* their products – which means a good chance they'll be getting a huge swarm of traffic on their day (or week) of launch. If you can hook up with a seller (who's launching soon) to get your banner placed on their download page, in their member area, or even perhaps in the product itself (if there's a section for banners), you'll have hit a mini jackpot...

I placed an ad inside one of my own member areas that had just launched in the Special Offers section of the Warrior Forum, and that little banner ad, such a simple thing that only took 5 minutes to put online, **made me \$1,000's!!**

And I STILL have traffic coming in from banner ads that I've loooong forgotten about!

I'm tellin' ya, lists and banners ROCK:

Lists/solos = lightning *fast* traffic!

Banners = hands off *autopilot* traffic (once placed)!

If you're on a low budget, like I said you can do all the wheeling and dealing you want. I've saved *thousands* on ads just for ASKING for discounts. And I've done some nice trades as well – no money involved!

Imagine 10 banners placed online for 5FigureDay bringing you autopilot traffic day after day...

This WILL happen - I repeat WILL happen for you - if you just put in the time and effort. It takes some work up front, but it's WORTH it!

Remember this...

If you are not making money online, something is obviously WRONG...

If your car isn't working, do you simply get out and walk away from it forever? No, you find the problem and *fix it*. Perhaps it just ran out of gas!

It's the same with making money online...

You've got a PROVEN "vehicle" – the 5FigureDay system. Our system flat out WORKS like crazy.

... You simply have to give it gas!

Traffic = gas. And I've shown you where to get UNLIMITED "refills" so that you'll NEVER run out, nor EVER get stranded and "stuck on empty" – showing an ugly "0" in your stats counter next to leads and clicks.

Again, I'd encourage you to print this special report out. It's the solution to THE problem that so many people face online no matter *what* the biz opp or system or opportunity may be. They ALL require traffic.

No more chasing shiny objects! This is IT. You're in the right SPOT. You have the "ultimate system" at your fingertips, and now I'm putting my faith in YOU to take action...

“I want YOU to be the next 5FigureDay success story!”

...So do us both proud and put what you've just read into instant action! Set a weekly GOAL in how many leads you want to get, and *work* toward that goal every day, or as often as possible.

Hurry - success awaits!

God bless!

Bryan
